**The Ray
Of Many**

The ray of multiplicity.

China – a 3rd ray country. Muchness

Commerce

It is the ray of commerce, enterprise, and the entrepreneur

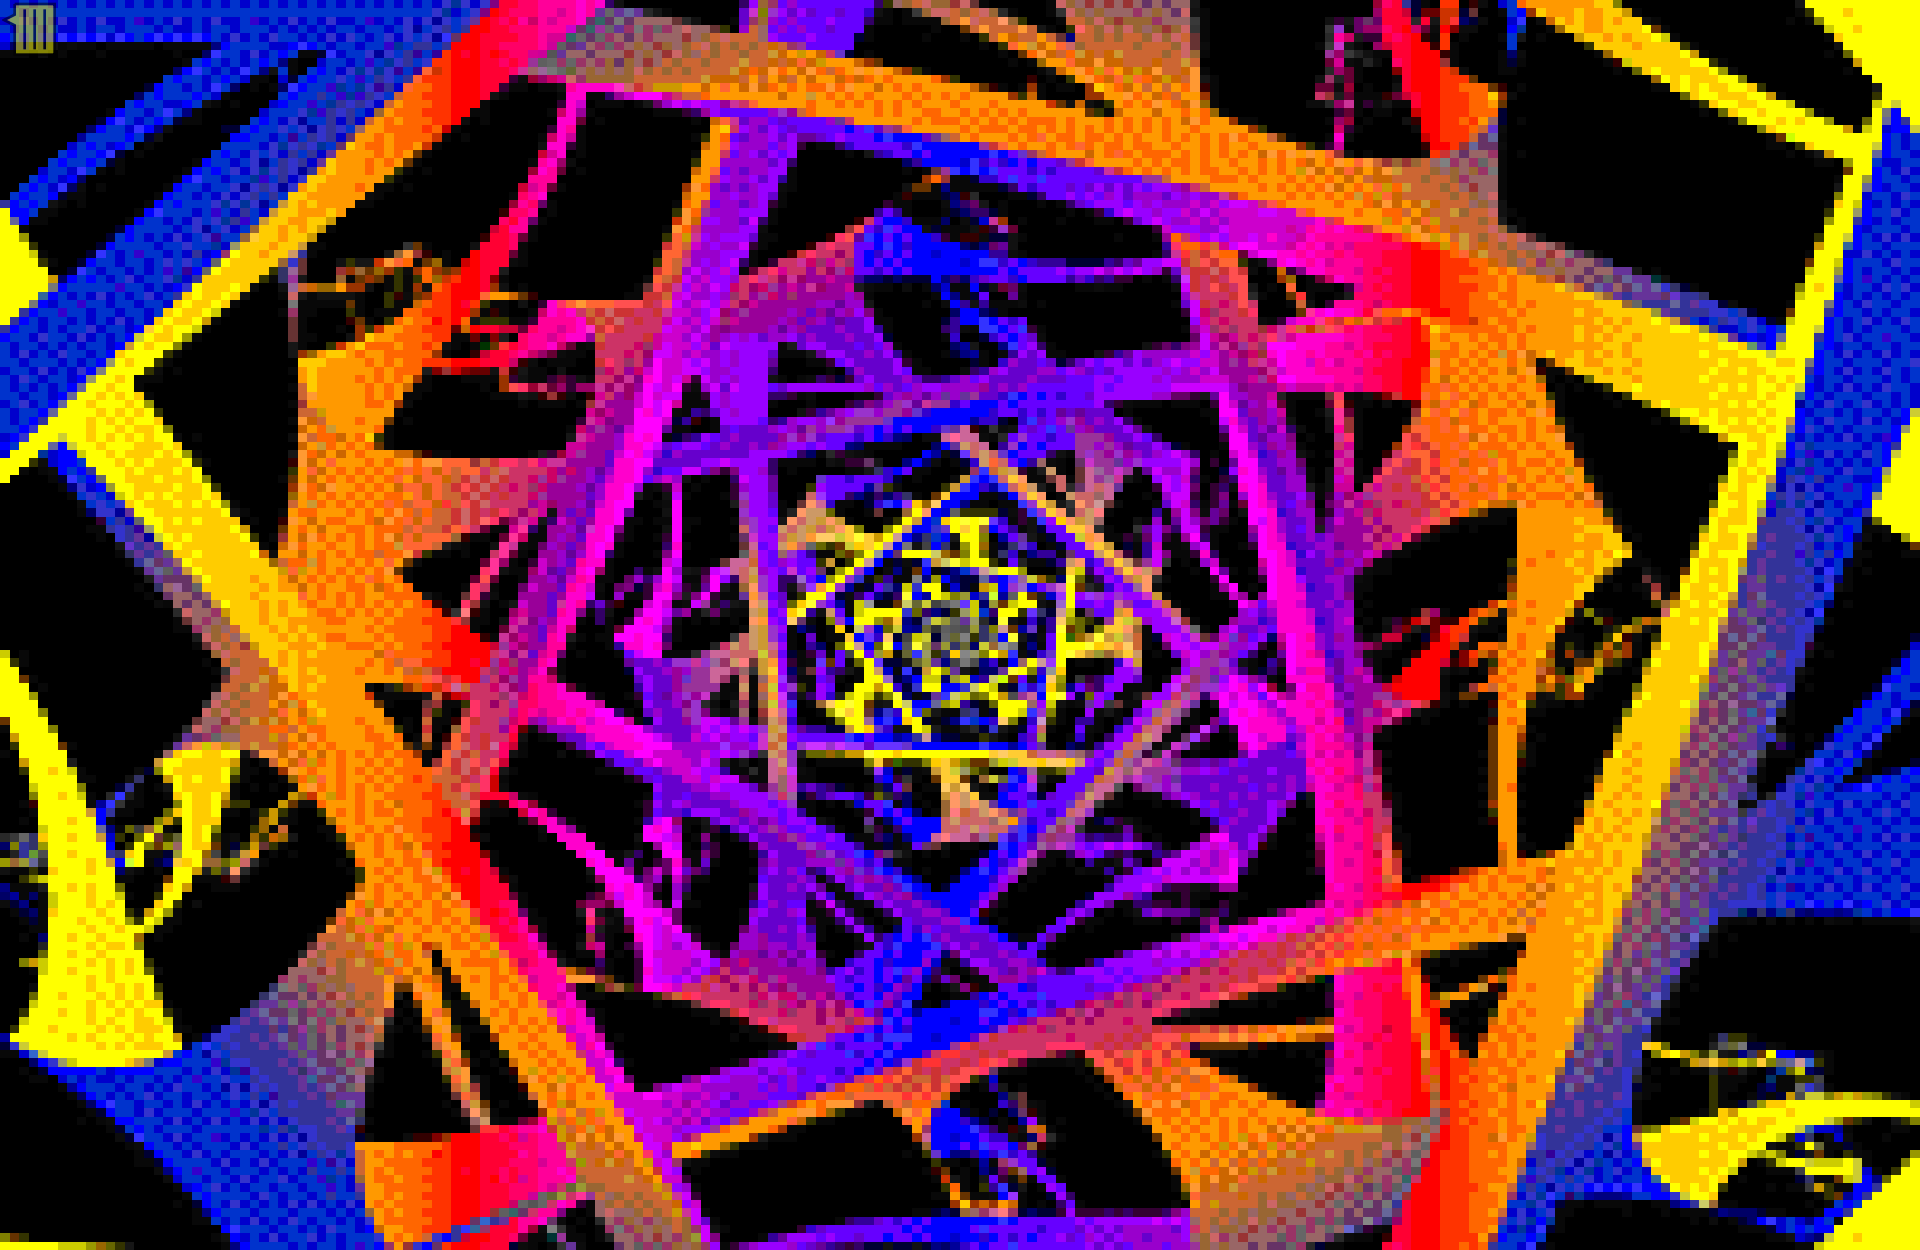

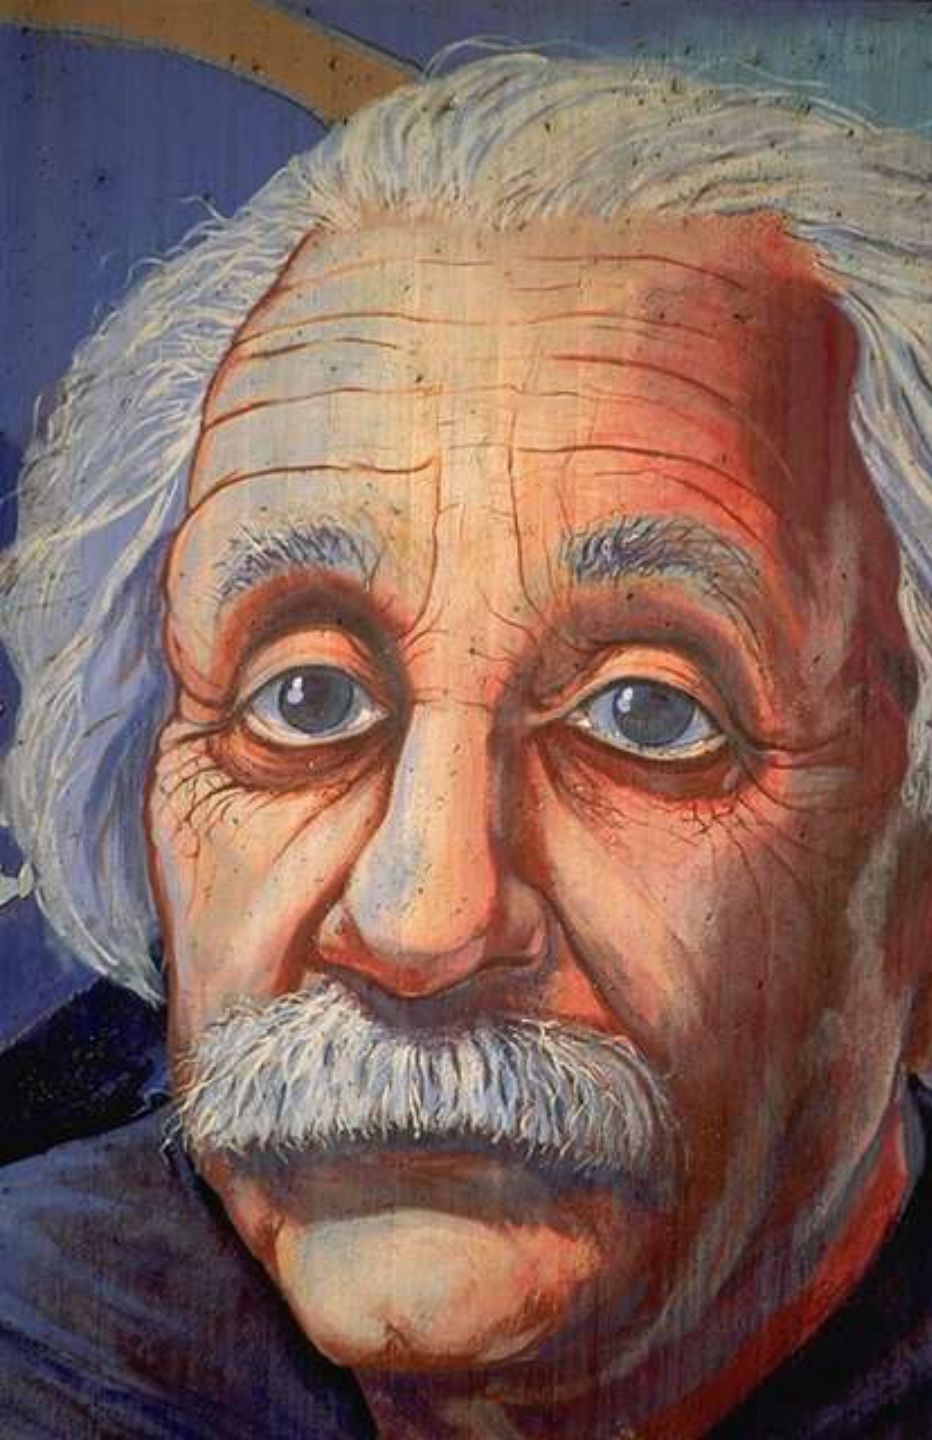

Communication is the translation of thought or feeling into expressive forms.

All life on the planet communicates.

This is the Third Ray.

Ability to weave, manipulate, be flexible

$$E=MC^2$$

The 3rd ray is the evolution of the intelligence principle in matter. Intelligence, potentially found in substance, causes activity.

Abstract Intelligence – abstract ideas seeking conveyance

Tangents Weaving

**Nature, the colour
green.**

Meandering, “S” shape,
Nature.

The Bounty of the Earth

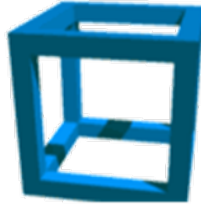

**As the Ray of Abstract Intelligence,
it takes that which is abstract and makes it known.
It takes ideas and turns them into projects, inventions, cultures,
philosophies, economic systems, and biodiversity.**

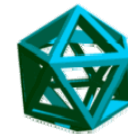

Platonic Solids

The Platonic Solids belong to the group of geometric figures called *polyhedra*. The solids and their regularities were discovered by the Pythagoreans and were called originally Pythagorean solids. They were later described by the Greek philosopher Plato and hence today they are well-known under the name "Platonic Solids."

Geometry

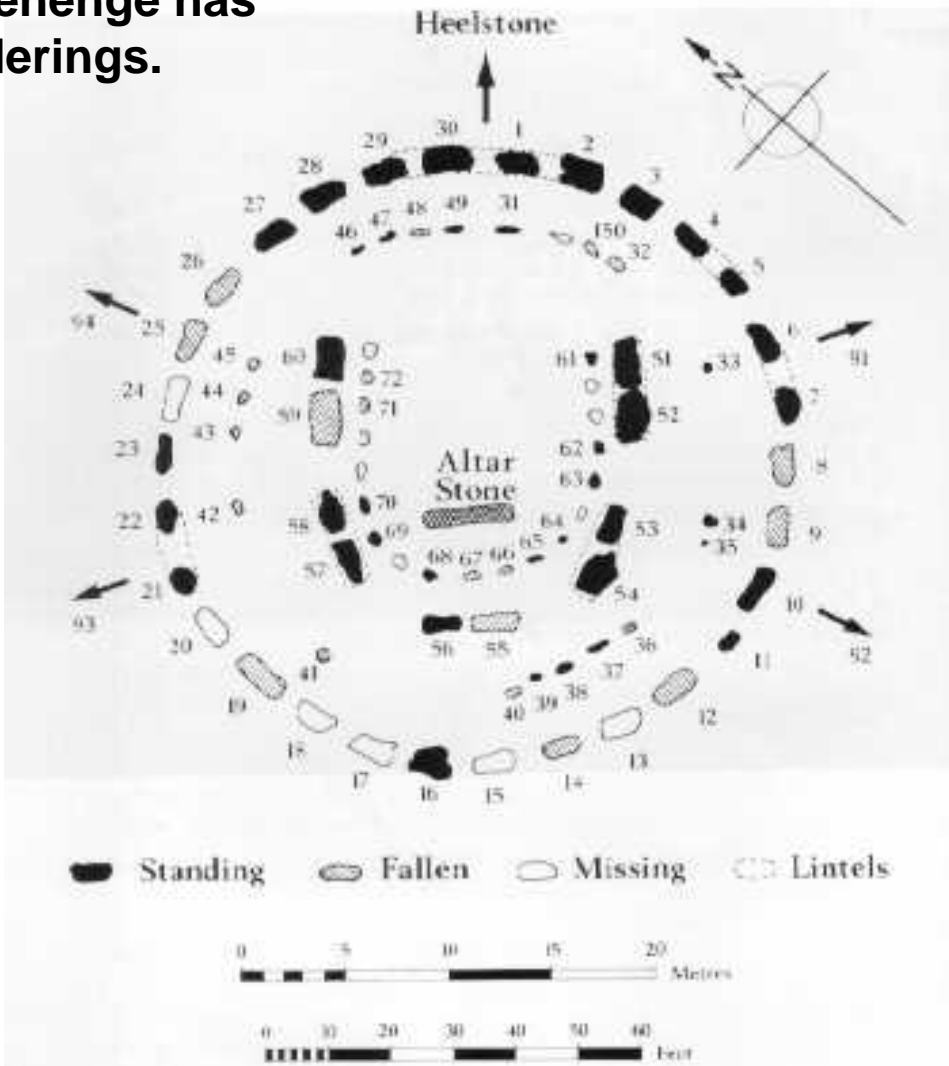

Stonehenge

Stonehenge correlates to Platonic Solids as three dimensional objects. In this image Stonehenge has been overlain on the Platonic Solid renderings.

"Time Stands Still" Keith Critchlow

Plan of Stonehenge showing the original position of the stones, and those fallen or missing

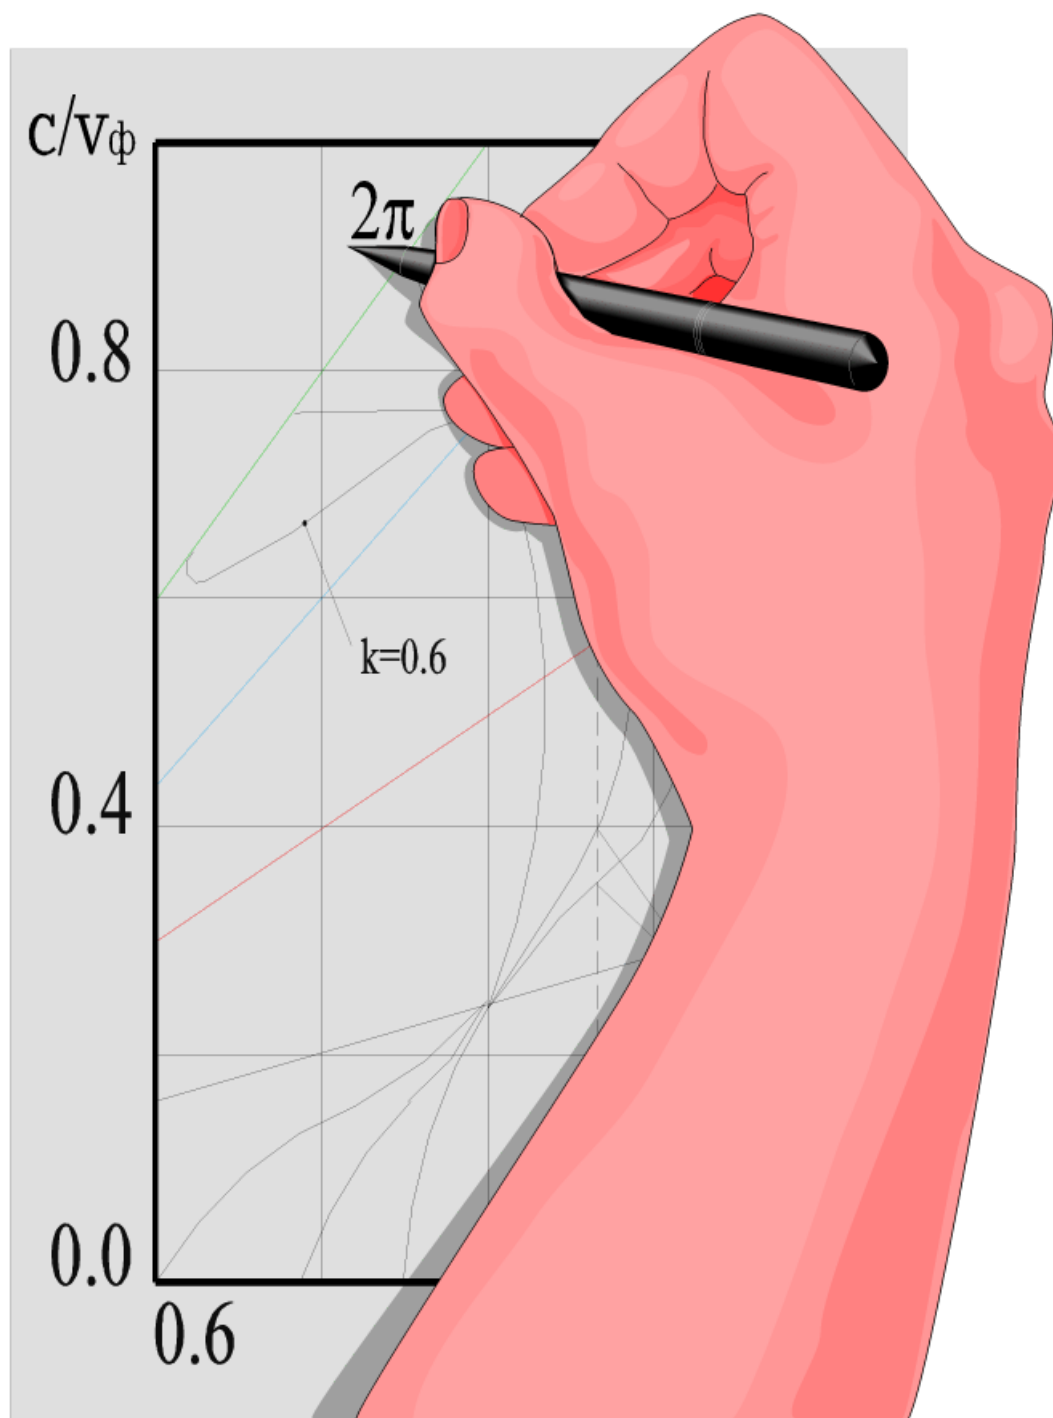

**Mutation,
mutability,
adaptation, and
an economical
utilization of
all energy and
resources
is the
Third Ray.**

It is that
which
gives
something
abstract a
temporary
or known
value.

Alphabets and Words are abstractions
that convey thought.

Languages

- Water - english
- L'eau - french
- Aqua - latin
- Agua - spanish

These words all mean the same thing, yet different languages use different sounds and words to convey the concept of 'water.'

The Third Ray adapts anything to suit its needs.

Commerce, business, civilization

Geometry existed before the creation.

Johannes Kepler

Ray 3: Active Intelligence or Adaptability

- **Humanizing the 3rd ray:**
 - great mental agility, skillful communication, facility with language and thoughts,
 - power to manipulate thought, to weave, flexibility
 - scientific investigation of principles and concepts, understanding of relativity, quantum physics, concretizing the abstract,
 - philosophy, astrology (conceptual & complex), time.
- **Economics** – Economics is an abstract concept. The value of something (matters) is flexible and adaptive set by the desires and importance of the time.
 - Eg: cinnamon – was highly valued several hundred years ago, now it is bought easily in any store.
 - Eg: whale oil – was highly valued and almost caused the decimation of the whale population world wide.
 - Eg: crude oil – only began to have value with the industrial revolution which produced the machinery necessary to pump it out of the ground, which fed industry long before it replaced coal and wood as a fuel source for the average Westerner.
 - This “morph-ability” of the thing and its value is an example of a concept taking form and the need for concept to be mutable.
- Business, commerce and use of money,
- Understanding relativity – the relation of thing to thing and the result of that relationship. Algebra, geometry.
- The production of cultures and civilizations.

Ray 3: Active Intelligence or Adaptability

- **Symbols** - triangle, S, \$ (fluid use of matter), web
- **Animal** - snake, spider, fox, cat, bee, ant, beaver, weasel
- **Country** - China (P), France, (P). Middle East. The Jewish people (P).
- **Institutions** - banks, financial institutions, stock market, advertising agencies, the Internet (worldwide web)
- **Vocational tendencies** - philosophy, academia, business, finance, entrepreneur, market speculation, advertising, lawyer, salesman, marketing, astronomer, linguist, strategist, economist, mathematician.
- **Persons** - John D. Rockefeller, Steven Spielberg, Woody Allen, Isaac Newton & Asimov, Bill Gates, Donald Trump, Albert Einstein, Ken Wilbur, Voltaire
- **Color** - exoteric: black esoteric: green

Ray 3 Distributed through...

Signs:

Cancer, Libra, Capricorn

Planets:

Saturn, Earth

Ray 3

STRENGTHS

Activity and adaptability

Mental fertility and creativity

Mental activity and agility

Theorizing and speculating

Planning and strategizing

Rigorous analysis and reasoning

Abstract thinking

Understanding of relativity

Modifying and qualifying for the sake of accuracy in thought

Skillful communication

Facility with language

Facility for understanding and handling money

Business aptitudes

Philanthropy

Power to manipulate

Ray 3

WEAKNESSES

Intellectual pride

Tangential, circuitous

Criticism

Vague and overly-complex thought

Excessive thinking without practical action

Perplexity and confusion

Absentminded

Hyperactivity, restless, wasted motion and rush

Tendency to be scattered or “spread too thin”

Inaccuracy in practical detail; careless

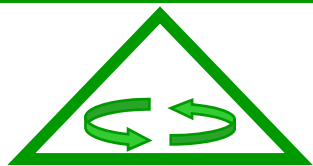

Manipulative and calculated

Opportunism; amoral materialism

Devious, deceitful, deceptive, circumventing the truth

Chameleon-like; over-adaptable

Ray 3 — Active Intelligence or Adaptability

Energy

Rotary Motion
Circuitous Weaving
Versatile Adaptive
Malleable

Quality

Activity
Adaptivity
Multiplicity
Selectivity
Economy

Symbols

Triangle
Spider
